seeryx

The prediction market that trades like an exchange

Our own order book, native USDC in each trader's own on-chain account, no gas. Live on Solana mainnet.

SEED ROUND

$300K

on a SAFE · $4M cap

SINCE OCTOBER 2026

Live

on Solana mainnet, real USDC

— THE PROBLEM

Today's prediction markets: slow, fragile, fenced off

Laggy

Orders wait for slow chains or slow books. The price you click is not the price you get.

Wrapped money

Balances are wrapper tokens over bridged stablecoins. Each layer is one more contract that can fail or be frozen.

Shared wallets, outside code

One hot wallet holds everyone's funds, vendor scripts run on the site. On October 29, 2026 both were exploited on large platforms in one day.

Fenced off

The leaders block or limit dozens of countries, or ask for passport and tax ID.

— THE SOLUTION

An exchange-grade market, with the money in your own account

Trades like an exchange. Our own matching engine: order accepted in 3.5 ms (median), every fill settled on Solana

Your money stays yours. Native USDC in each user's account in our Solana program; only the owner withdraws

No friction. Any wallet or email, one approval a year, no gas, free deposits from ten networks

Outcomes we can't change. Events resolved by UMA, rounds by the exchange price

TRACTION

Live on Solana mainnet for a month

VOLUME, 30 DAYS

$21.6K

traded on Solana mainnet

TRADES, 30 DAYS

1,897

filled and settled on chain

WALLETS CONNECTED

Data: seeryx.com public API and DefiLlama, November 2, 2026

WHY NOW

Prediction markets and Solana are both taking off

$53B
Kalshi + Polymarket volume in July 2026, double May's

~$10B
monthly volume on Polymarket alone in 2026

#1
Solana: the top chain for DEX trading, quarter after quarter

$15.7B
stablecoins on Solana, +51% year over year (H1 2026)

$1.9T
moved in stablecoins on Solana in H1 2026

22.5%
of all stablecoin transactions worldwide

BUSINESS MODEL

We earn on every trade

01 · TRADING FEES

≤ 1.75¢

per share, paid by the taker: 7% × p × (1 – p). Makers get 20% back. Actual take rate: 0.25% of volume.

02 · MARKET MAKING

Spread

Our own market maker quotes every book and earns the spread plus the maker rebate, within risk limits. P&L: to be added

03 · WITHDRAWALS

$1

per instant withdrawal; deposits and delayed withdrawals are free.

NEXT

Data and widgets

Paid access to odds, books and history for funds and media; embeddable odds with revenue share.

NEXT

Sponsored markets

Brands and media fund markets on their topics and get reach. UMA decides the outcome.

— THE PATH

0.1% of Polymarket's volume = $25K revenue a month

MARKET
~$10B
Polymarket volume a month

×

OUR SHARE
0.1%
≈ $10M volume a month

×

TAKE RATE
0.25%
actual, last 30 days

=

REVENUE
$25K
a month · ≈ $300K a year, fees only

NOW
$21K / month
Product live, first traders

+3 MONTHS
$500K / month
Partners, campaigns, Panama entity

+6 MONTHS
$2–3M / month
Data providers and crypto partners

+12 MONTHS
$10M / month
0.1% of Polymarket

Fee revenue only; market making and withdrawal fees not included

GO-TO-MARKET

Growth channels already running, now to be scaled

PARTNERS

Up to 40% of fees

Creators, communities and trading groups earn on the traders they bring.

REFERRALS

20% + 10% cashback

The referrer earns 20% of a friend's fees; the friend gets 10% back.

WEEKLY TOURNAMENT

$175 a week

Top traders by volume share a USDC pool. Running since October.

LEVELS

Up to 35% off fees

Points for volume, invites and quotes; higher levels pay less and earn bigger rebates.

BOTS AND MARKET MAKERS

Open API, SDKs

Liquidity rewards for quoting near the mid.

CONTENT

X, Instagram, TikTok

Short product videos, market breakdowns, founder posts.

We measure each channel by funded accounts, first trades, weekly retention and cost per trader

— THE TEAM

We built the exchange and run its market making ourselves

CO-FOUNDER, CEO

Roman

Serial founder. Runs a market-making business on Binance, Bybit and other exchanges with billions of dollars of monthly volume combined. Built a CS2 farm of 20,000+ accounts. other projects

CO-FOUNDER, CTO

Nikita

5+ years in crypto. Before Seeryx: DevOps engineer at a decentralized exchange. Built the exchange's infrastructure and security.

linkedin.com/in/nicorehov

SENIOR ENGINEER

Vitalii

16+ years in software development.

linkedin.com/in/vitalii-oriekhov

SENIOR ENGINEER

Zak

12 years in crypto.

The whole team works on Seeryx full time

— FINANCES

Lean today. Founders take no salary.

RUNNING COSTS TODAY, A MONTH

Servers, CDN, signing servers (AWS)	~$150
CI, code analysis, domain, network fees	~$110
Weekly tournament prizes	~$200
Total	**~$460**

Paid by the founders so far. Infrastructure grows with volume (RPC plan, larger server).

THE $300K ROUND

$195K

growth spend: marketing $135K, partnerships $45K, Panama entity $15K

$105K

working capital, not spend: market-making liquidity $90K, refundable UMA bonds $15K

No salaries in the round: every dollar goes into growth. The team is paid from revenue once the exchange earns it.

— INVESTMENT

First outside round: $300K on a SAFE

$300K

for 12 months of growth

$4M cap

SAFE valuation cap · ≈ 7.5% of the company

USE OF FUNDS

Marketing and referrals	45%	$135K
Market-making liquidity (working capital)	30%	$90K
Partnerships and integrations	15%	$45K
New markets and UMA bonds (refundable)	5%	$15K
Panama legal entity	5%	$15K

Everything live today was built on the founders' own money

RISKS

What could go wrong, and what we do about it

LEGAL

Entity and permitted markets

A Panama company in the first three months ($15K in the round), with legal advice on prediction markets. Sanctioned jurisdictions are excluded today.

SECURITY

No outside audit yet

Non-custodial design, isolated signing keys, six internal reviews, SonarQube A. An independent audit and a time-locked multisig follow the first revenue milestone.

LIQUIDITY

Thin books early on

Our own market maker quotes every book within risk limits; $90K of the round is its working capital, plus rewards for outside makers.

DEMAND

A small base so far

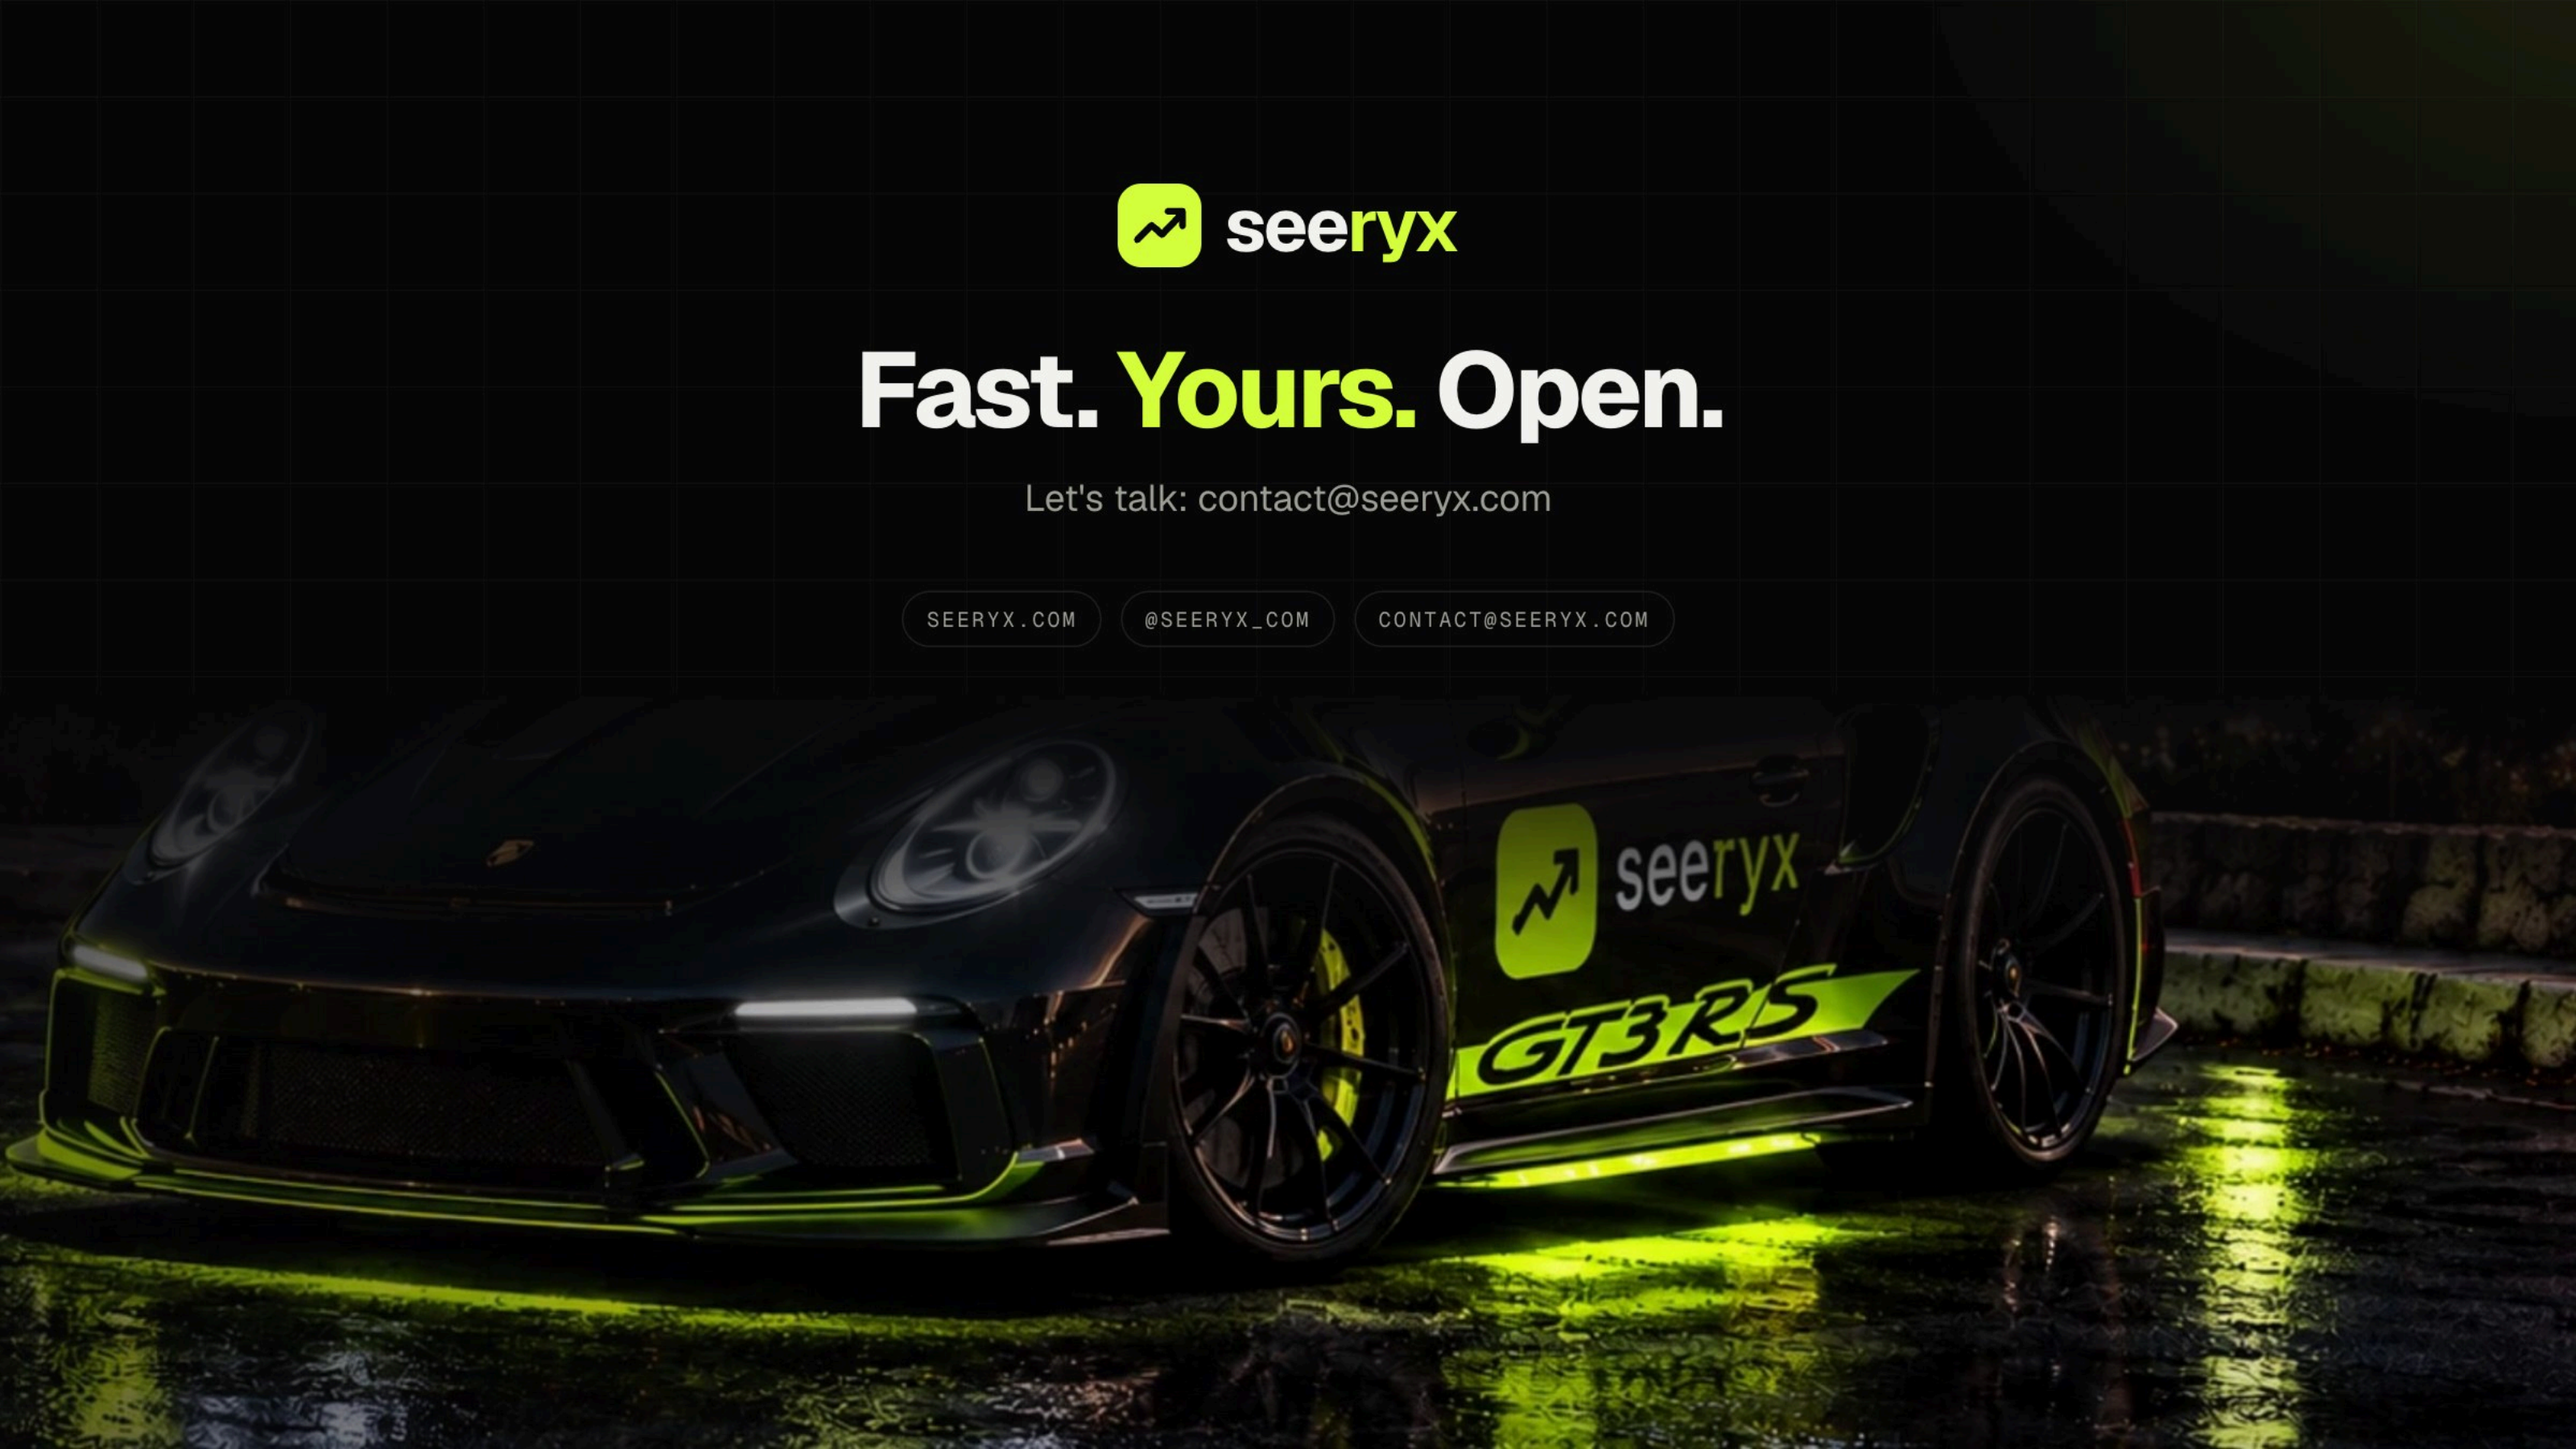

Every channel is measured by funded accounts, retention and cost per trader; spend moves to what works.

seeryx
