seeryx

The prediction market built for speed and safety

Native USDC. Your own on-chain account. Orders matched in microseconds, settled on Solana.

CRYPTO · STOCKS · SPORTS · ESPORTS · POLITICS · FINANCE

INVESTOR DECK · 2026

THE PROBLEM

Today's prediction markets: slow, fragile, fenced off

Laggy

The price you click is not the price you get.

Unsafe money

Your balance is a wrapped token, not real USDC or USDT.

Third-party code

Outside vendors' scripts run on the site, and one breach drains users.

Geo-blocks

Whole countries are cut off or allowed to close positions only.

THE SOLUTION

Seeryx fixes all four, by design

LAGGY →

Our own CLOB

Instant matching, settled on Solana.

UNSAFE MONEY →

Native USDC

Real USDC from Circle. No wrappers, no bridges.

THIRD-PARTY CODE →

Zero vendor scripts

Only our own code runs on the site.

GEO-BLOCKS →

Open worldwide

One product for every region.

WHY NOW

Prediction markets and Solana are both taking off

$53B

Kalshi + Polymarket volume in July 2026, double May's

~$10B

monthly volume on Polymarket alone in 2026

#1

Solana: the top chain for DEX trading, quarter after quarter

$15.7B

stablecoins on Solana, +51% year over year (H1 2026)

$1.9T

moved in stablecoins on Solana in H1 2026

22.5%

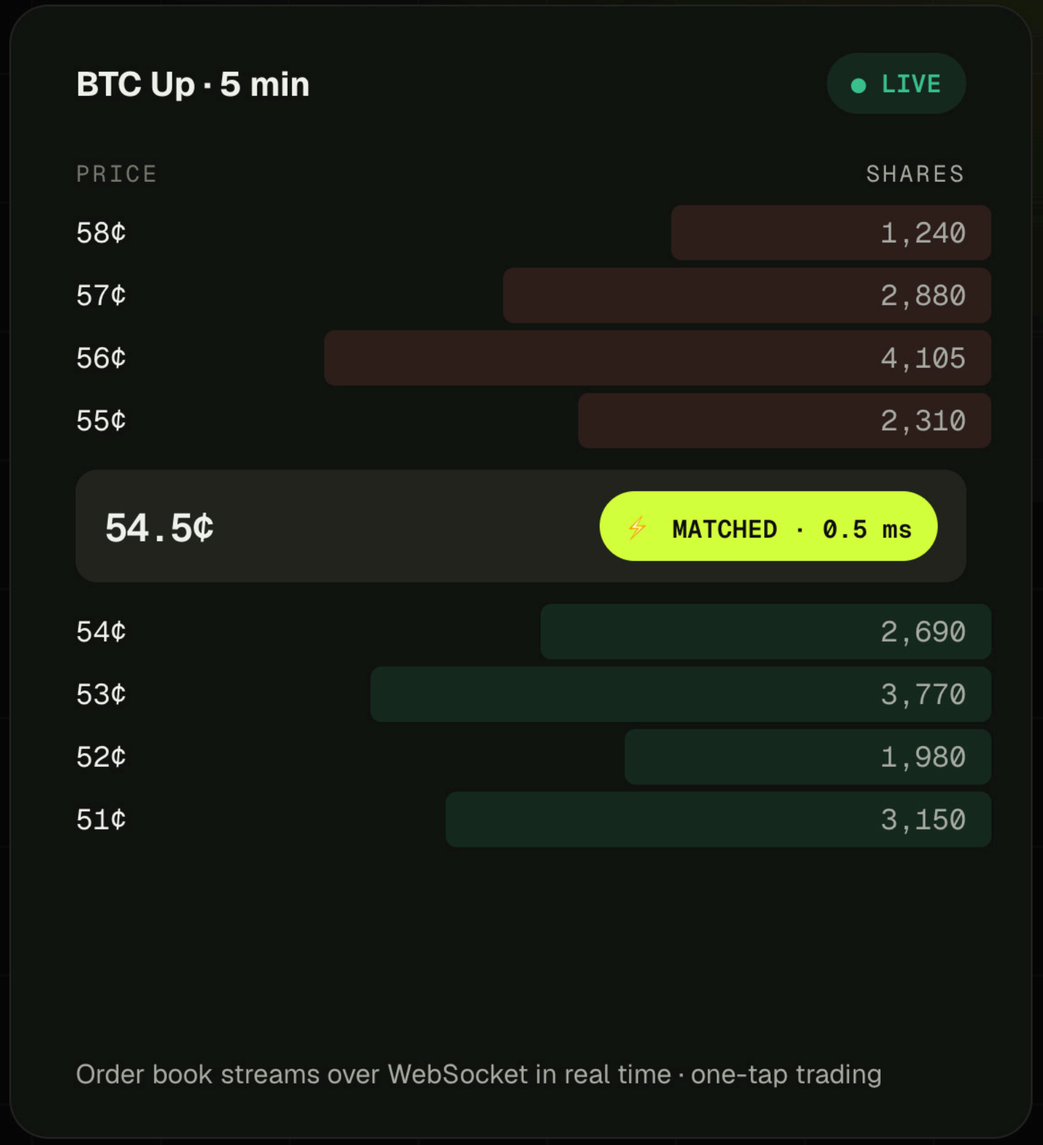

of all stablecoin transactions worldwide

Sources on the last slide

— 01 · SPEED

Our own CLOB: the price you see is the price you get

A central limit order book written in Rust, the same model as professional exchanges. Every order is checked, matched and confirmed by our engine, then settled on-chain.

MATCH

0.5 ms

inside the engine

ACCEPTED

3.5 ms

median · p95 8.7 ms

Illustrative book; latency figures measured on seeryx.com

WHY SOLANA

A trade confirms in ~150 ms. Others make you wait.

Orders go through about 30× faster than on Polymarket.

— 02 · SAFE MONEY

Real native USDC, in an account only you can withdraw from

POLYMARKET

Your balance	pUSD (wrapper)
↓ backed by	
Bridged token	USDC.e
↓ locked in	
Bridge contract	another chain

Each layer is one more contract that can fail or be frozen.

→

SEERYX

Your balance	native USDC · Circle

- ✓ Held in **your own account** inside our Solana program, never in a shared hot wallet
- ✓ The contract pays out **only to your own wallet**, enforced on-chain
- ✓ Deposit USDT or USDC from any major chain; it lands as native USDC

USDC mint EPjFWdd5…Dt1v · program 2uUbvYHq…aiv

— 03 · SECURITY

Security is our obsession. What protects you today:

WEBSITE

Zero third-party scripts

The browser is allowed to run only our code. A hacked vendor has nothing to hijack.

SIGNING

Every transaction checked

Before your wallet signs, we verify it does exactly what you asked. Anything extra is refused.

KEYS

No keys on public servers

Signing keys sit in an isolated vault. The program upgrade key never touches a server.

RELEASES

Every deploy verified

Locked dependencies, signed builds, and a manual approval before anything reaches mainnet.

✓ Professional review of the funds layer ✓ Books checked against the chain every 5 min → Next: independent audit, time-locked multisig

— OCTOBER 29, 2026 · STRESS TEST

Two big platforms were drained in one day. Neither attack works on Seeryx.

Binance

~$2.5B

moved out of exchange hot wallets; $1.8B of it frozen by Tether and Circle

- ✕ One shared wallet held everyone's money

Polymarket

$2.7M

drained from 700+ user wallets through a hijacked third-party script

- ✕ A vendor's script on the site sent the funds

Seeryx

$0

lost. Neither path exists here:

- ✓ No shared wallet to empty
- ✓ No outside code on the site

On-chain data: Ethereum and Polygon, Oct 29, 2026

— 04 · ACCESS

For everyone, everywhere

- Any wallet and any device, including in-wallet mobile browsers, or sign in with email
- Deposit from every major network, fee-free; no gas, no SOL needed
- Instant withdrawals; winners paid automatically

POLYMARKET AND OTHERS

30+

countries where access is blocked or close-only; new blocks every few months

SEERYX

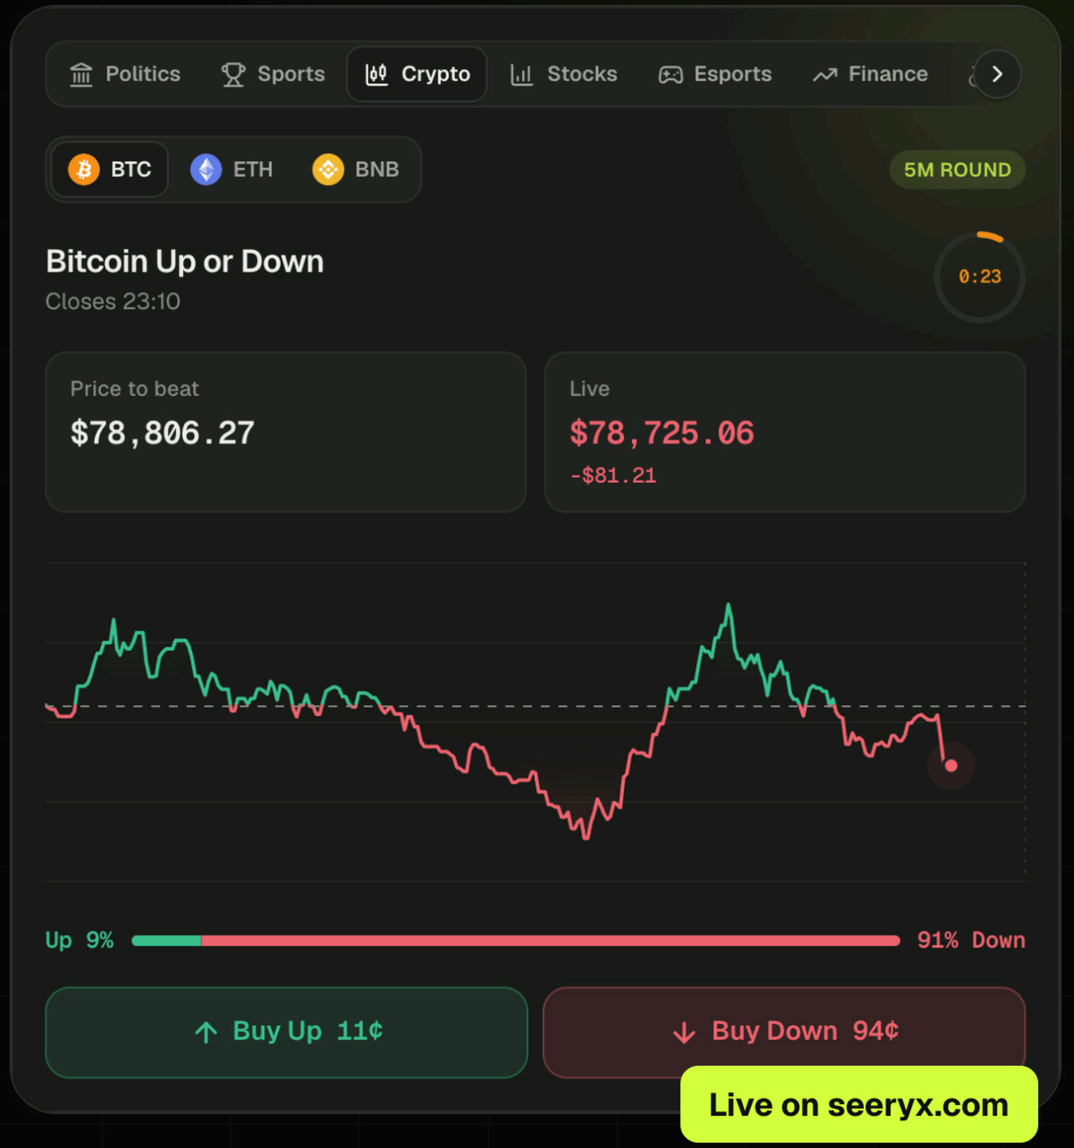

Available everywhere

one product for every region we operate in (sanctioned jurisdictions excluded)

— THE PRODUCT

Call it right. Get paid.

- Odds follow the market, live
- One-tap trades, no gas
- Payouts are automatic
- Crypto rounds from 5 minutes, plus politics, sports, esports, stocks and finance

FAIR OUTCOMES

No Seeryx key can change a market's outcome

STEP 1

UMA

decides the outcome; anyone can dispute it within 15 minutes

→

STEP 2

Wormhole

guardians sign the result and carry it to Solana

→

STEP 3

Solana smart contract

verifies the result and pays winners in about 3 minutes

Every step is public

Each settlement links to the transaction for every step.

Crypto and stock rounds

settle automatically at the exchange price, no human in the loop.

TRACTION

Already live on Solana mainnet

250+
open markets: sports, esports, politics, finance, crypto, stocks

$5,273
volume over the last 30 days · 935 trades

59
trader accounts · 13 traded in the last 7 days

$1,562
TVL on Solana, per DefiLlama

40k+
views across our social channels

7
languages: EN, RU, UK, DE, FR, IT, ES

Listed on DefiLlama · open APIs, WebSocket, and Python and Rust SDKs for bots and market makers.

Data: seeryx.com and DefiLlama, Oct 29, 2026

BUSINESS MODEL

How we make money

01 · TRADING FEES

≤ 1.75¢

per contract, 0 at extreme prices · 20% goes to makers

02 · WITHDRAWALS

$1

per instant withdrawal · deposits are free

03 · MARKET MAKING

1¢

spread per contract on each side · plus the 20% maker rebate

Next: data and widgets

Live odds, order books and price history for funds, media and apps; embeddable widgets with revenue share.

Next: sponsored markets

Brands and media fund markets on their topics and get reach. UMA decides the outcome.

— THE MARKET

0.1% of Polymarket's volume = $38K revenue a month

MARKET

~$10B

Polymarket volume per month

×

OUR SHARE

0.1%

≈ $10M volume per month

×

TAKE RATE

0.38%

actual, last 30 days

=

REVENUE

$38K

a month · ≈ $456K a year

The fee depends on price: the taker pays 7% × p × (1 – p) per contract, up to 1.75¢ at 50¢ and close to 0 at the edges; 20% goes back to the maker, and the market maker pays no fee. The take rate therefore floats; the model uses the actual figure. Excludes market-making income and withdrawal fees.

GO-TO-MARKET

Six growth channels, all already running

01

Partners

Creators, communities and trading groups earn up to 40% of their traders' fees.

02

Referrals

The referrer earns 20% of a friend's fees; the friend gets 10% cashback. For life.

03

Weekly tournament

The week's top traders by volume split a USDC prize pool.

04

Points and levels

Trades, invites and quotes earn points. Higher level, lower fees.

05

Bots and market makers

Open APIs, WebSocket, Python and Rust SDKs, rewards for quoting near the mid.

06

Content

Short videos, market breakdowns and founder posts on Instagram, TikTok and X.

COMPETITION

The fastest, safest exchange with the widest access

	POLYMARKET	KALSHI	PREDICT.FUN	LIMITLESS	SEERYX
CHAIN	Polygon	Off-chain	BNB Chain	Base	**Solana**

ROADMAP

The product works. Time to scale.

Q3 2026 · DONE

Product ready

Exchange on Solana mainnet, 250+ markets

Q4 2026 · NOW

Round and marketing

Partners, campaigns, tournaments; independent audit

+3 MONTHS

$500K

monthly volume: new markets and a Panama legal entity

+6 MONTHS

$2–3M

a month: integrations with data providers and crypto projects

+12 MONTHS

$10M

a month = 0.1% of Polymarket ≈ $38K revenue

Then the ecosystem: our own markets, apps and partners built on Seeryx.

THE TEAM

We build market making and exchange infrastructure ourselves

R

Roman

CO-FOUNDER, CEO

10+ years in crypto. Leads the engineering team and a market-making company.

N

Nikita

CO-FOUNDER, CTO

5+ years in crypto. Before Seeryx: DevOps engineer at a decentralized exchange.

V

Vitaly

SENIOR ENGINEER

16+ years in software development.

Z

Zak

SENIOR ENGINEER

12 years in crypto.

— INVESTMENT

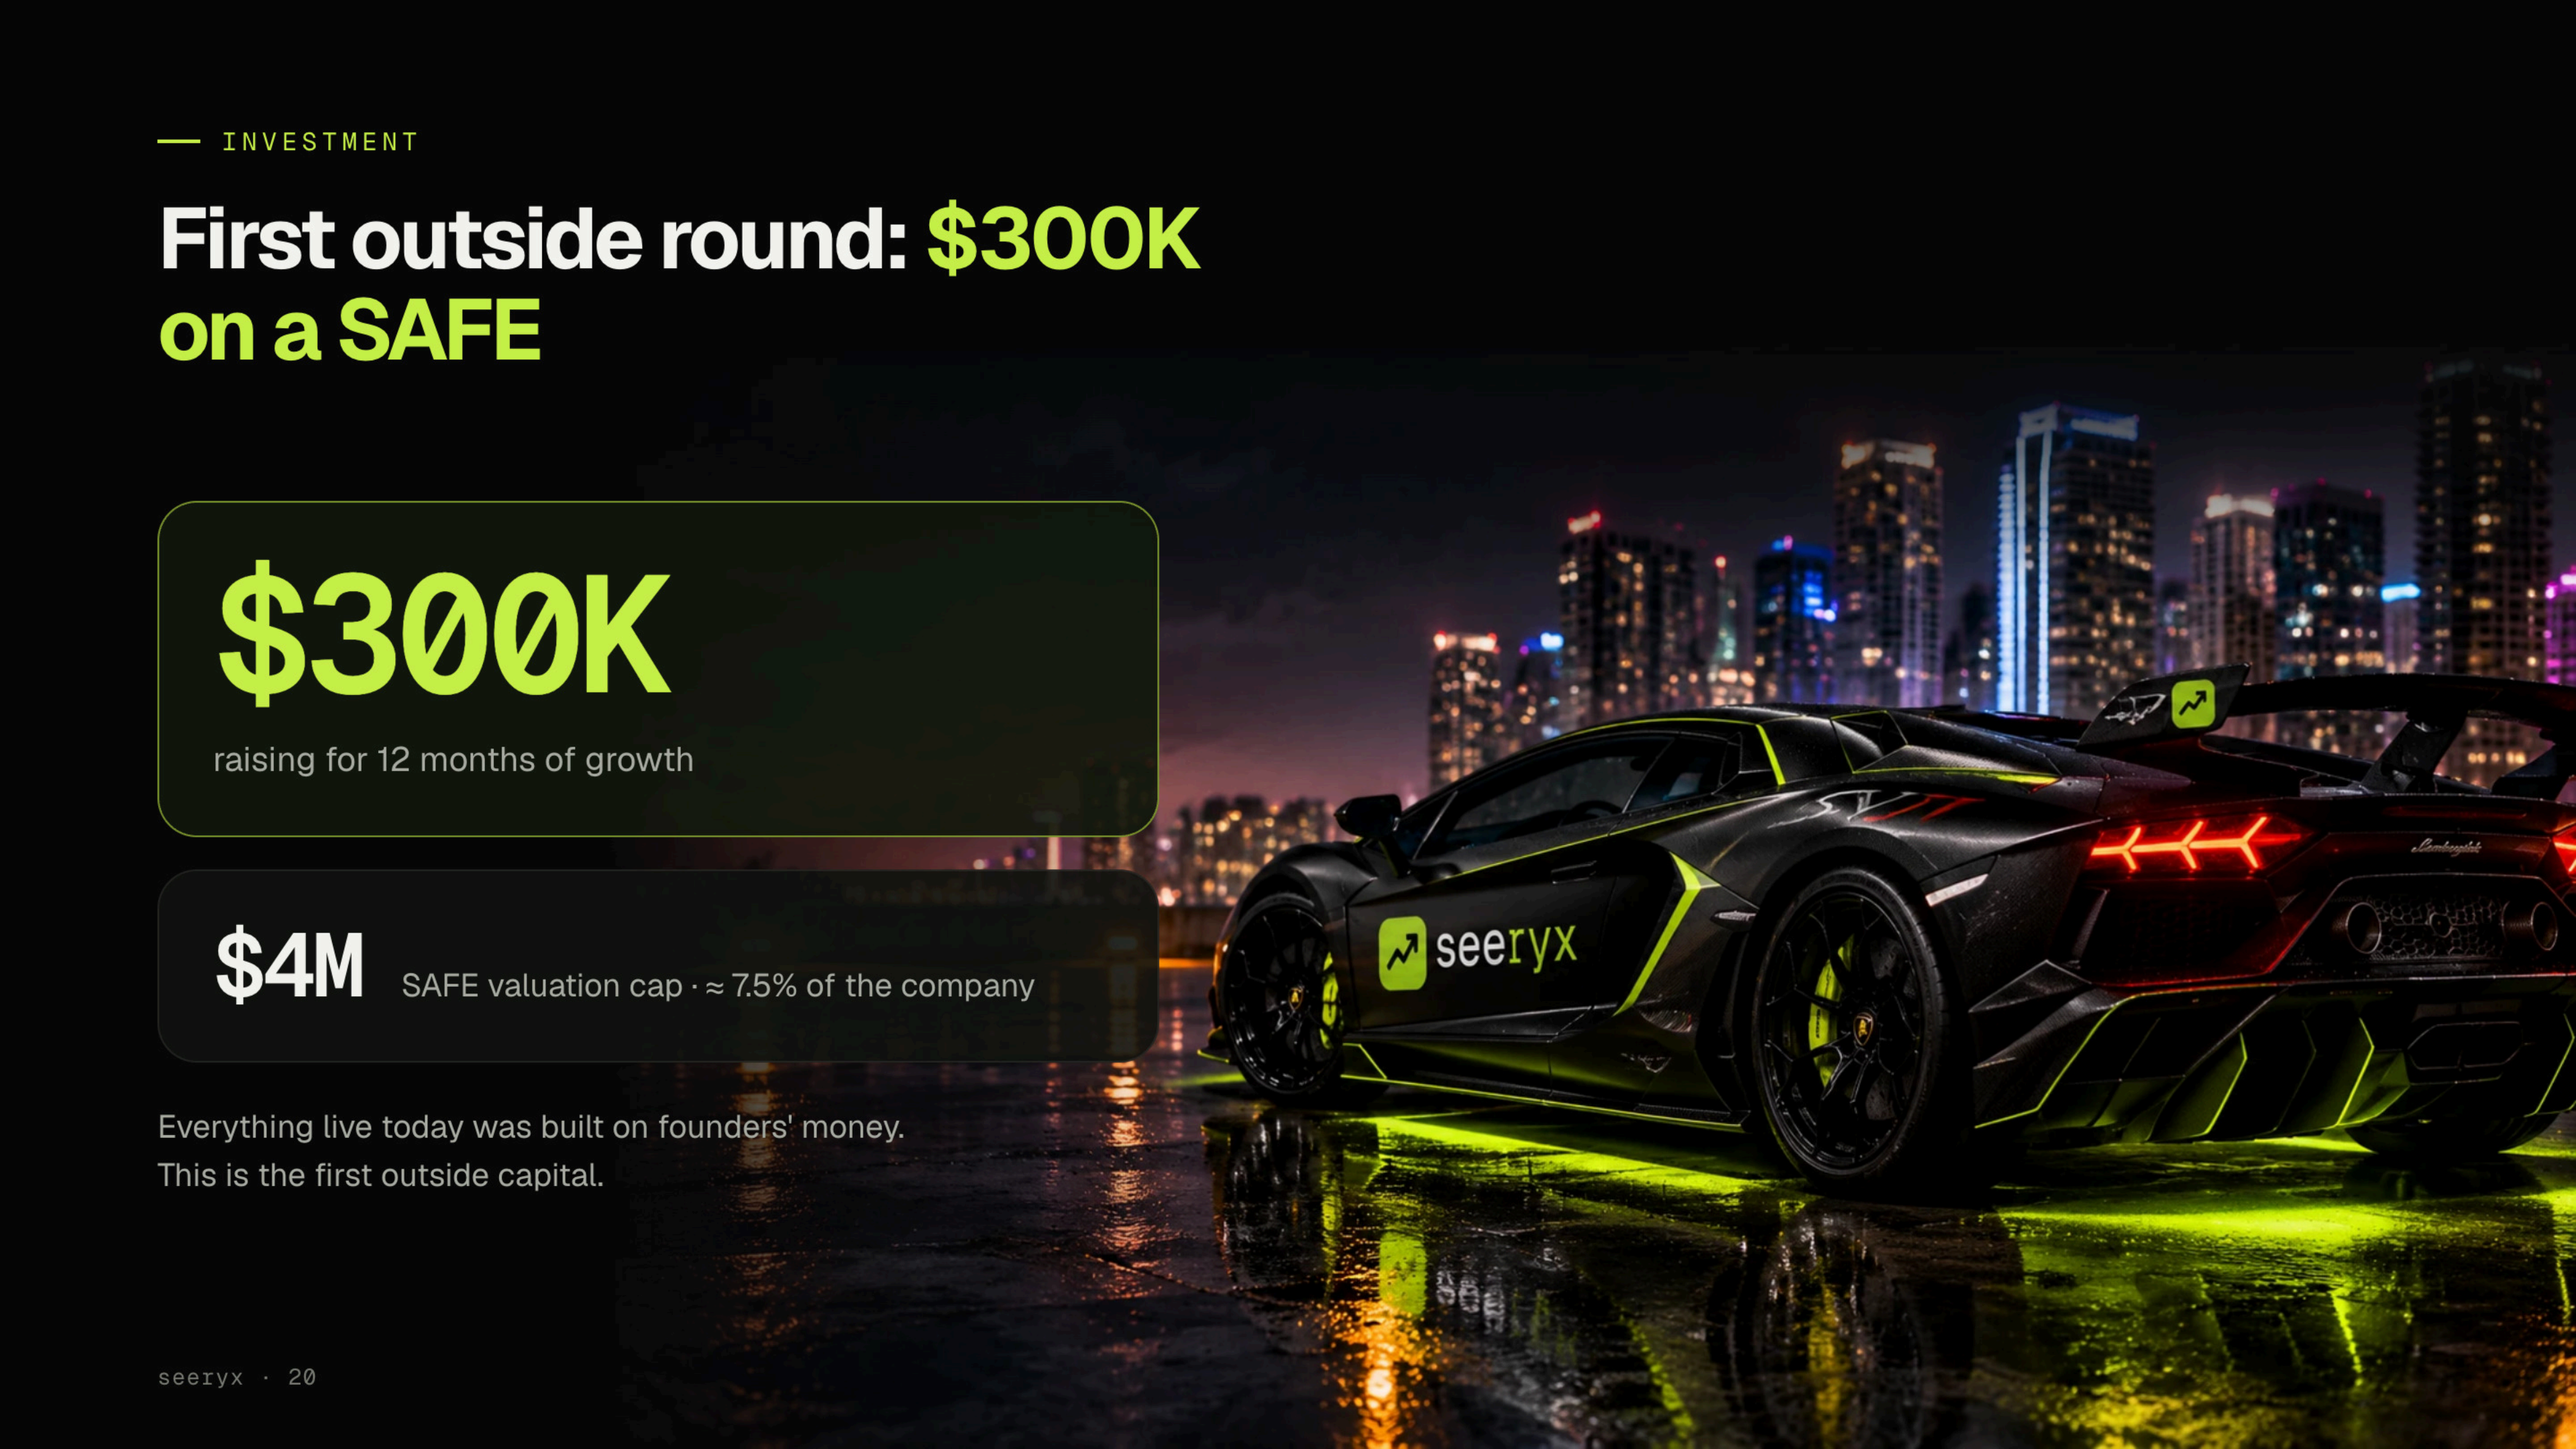

First outside round: $300K on a SAFE

$300K

raising for 12 months of growth

$4M SAFE valuation cap · ≈ 7.5% of the company

Everything live today was built on founders' money.
This is the first outside capital.

USE OF FUNDS

A third of the round is working capital, not spend

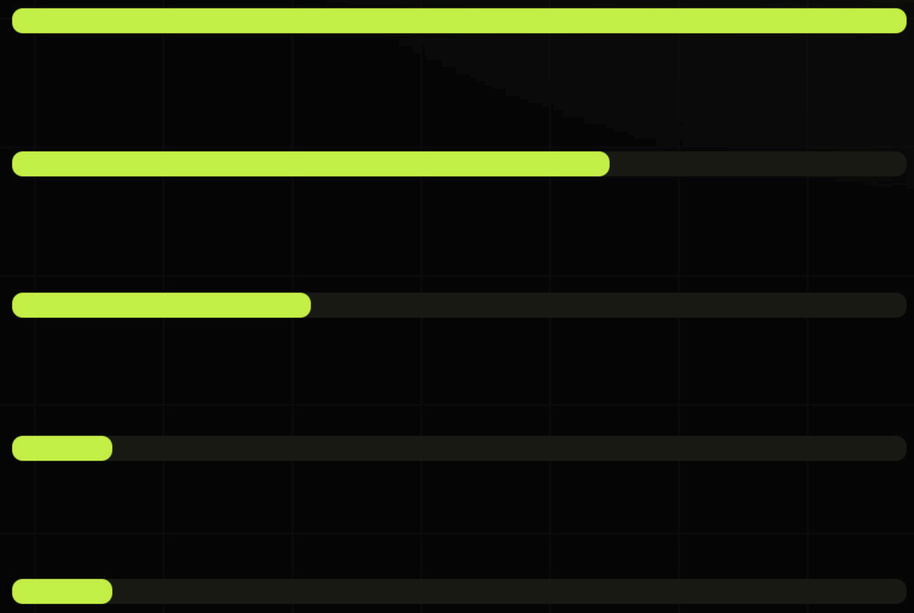

45% — **Marketing and referrals · $135K**
Partner program for creators and communities, tournament prizes, video, listings

30% — **Liquidity · $90K**
Market-maker capital in our order books, within risk limits

15% — **Partnerships · $45K**
Data providers and crypto companies: integrations, joint markets, campaigns

5% — **Markets · $15K**
New market launches and UMA bonds (500 USDC each, refundable)

5% — **Panama legal entity · $15K**
Incorporation and licensing once we reach $500K monthly volume
